

October 31, 2025

Eric Araújo  
Computer Science

Dear Professor Araújo:

I am pleased to report that the Faculty Development and Professional Status Committees have approved your request for a Calvin Research Fellowship (CRF). You will be credited 4 faculty load hours (FLH) in the 2026-2027 academic year for this CRF. It is expected that you will use your research time to work on the proposed project, "Modeling Political and Religious Polarization in Christian Communities." In a celebratory spirit, the Faculty Development Committee is pleased to invite you to a gathering for the university community to come together and congratulate you on Monday, May 4, 2026, 12:00 – 1:30 pm. Please mark your calendar.

You will be named one of next year's Diekema Fellows, and a part of your support will be paid through the Diekema Endowment, which was established to reward and encourage Calvin scholars in the early stages of their careers.

Details of how this award is to be applied will depend on the overall staffing situation in your department and should be worked out by you, your department chair, and your academic dean. Please note the policy on commissions, royalties, and patents in section 6.7 in the Handbook for Teaching Faculty.

At the conclusion of the term of your CRF, please submit an internal funding report in Workday through the "create request" process.

Your proposal contributed to the impressive quality of this year's pool of CRF and sabbatical applications. I thank you for your contributions to our institutional vitality on this front, and I wish you all the best as you pursue your research.

Sincerely,

David Wunder  
Dean for Faculty Development and Research Initiatives
