

THE MARJORIE G. HOOGEBOOM STUDENT FACULTY RESEARCH FELLOWSHIP**Established 2026****I. Background Information**

Marge Hoogeboom was an early pioneer in computer systems for the world of business, a leader for many boards and community organizations, a business partner, an accomplished oboist, and a loving wife, mom, grandma and grandma-great. After three years at Calvin College, she finished her B.S. degree in Computer Science at Purdue University in 1964. She went to work helping to build General Electric's first mainframe systems in the 1960s, and later led programming groups for Mead Johnson and Upjohn (now Pfizer). When her husband Tom started up a plastics coloring business in the 1970s, Marge was his essential partner, capably managing finances and administration in both Spectrum Colors and, later, Aslan Medical Technologies. She embodied servant leadership, contributing as team member, project leader, and board member for her churches, neighborhoods, Christian schools, Calvin University, World Renew's Disaster Response Services, and more. In all her endeavors, Marge truly knew she was blessed to be a blessing to others.

II. Administrative Guidelines

The name of the fund shall be:

The Marjorie G. Hoogeboom Student Faculty Research Fellowship

- A. The primary purpose of the fund is to support student-faculty research and mentoring through the research program at Calvin University. Fund expenditures may include:
1. Student research fellowship stipends for work under the direction of a Calvin University faculty member in the Computer Science department.
 2. Faculty research stipends to mentor student researchers during the summer research program and academic year.
 3. Supply and equipment purchases that support and enhance the research program.
 4. Other expenditures that support a student's experience in the research program.

III. Student Research Fellowship Specifications

- A. Award Criteria
 - 1. This fellowship will be awarded on a combination of academic interest and academic merit.
 - 2. The award will begin with a summer research fellowship completed under the direction of a Calvin University faculty member, the duration of which is established by the Science Division (ordinarily 40 hours per week for eight to ten weeks).
 - 3. Applicants should have an overall grade point average of 3.0 or higher.
 - 4. Students completing their first year are eligible to apply, but preference will be given to those entering their junior or senior year.
- B. Application Procedures:
 - 1. Candidates will apply for this fellowship following the process determined by the Science Division Research Program. Candidates applying for Science Division summer research positions will automatically be considered for this fellowship if they meet the criteria. No specific application for this fellowship is required.
 - 2. Recipients will be selected by the Science Division Summer Research Committee, in collaboration with the Computer Science Department.
 - 3. Students who wish to be considered for renewal must file a new application each year.

IV. Program Funding

- A. An endowment has been established in the name of this fund. The management of this endowment will be governed by the endowment investment policy of Calvin University as amended from time to time. This policy will dictate how the endowment is to be invested as well as how the income that will fund the fellowship each year is to be determined.
- B. A gift has been received in the amount of \$300,000.
- C. The university has the option of putting the fund on hold due to general market fluctuations or other funding issues, if the annual income will cause the endowment balance to fall below the principal value of the endowment. If this situation arises, the donors have the option of currently funding the award or a portion of the award to ensure the fellowship is always awarded.
- D. Funds not used in one fiscal year can be carried over to the next year.

V. Research Fund Specifications and Management

- A. This fund will be housed in the Computer Science department. Projects are encouraged that promote partnerships and collaboration between Computer Science and other disciplines or departments.
- B. This fund promotes opportunities for long-term or large-scale projects.
- C. This fund provides support for both a student research stipend as well as a paired faculty research stipend. The amount of the student research stipend will be comparable to the amount of the summer research stipends awarded through the Science Division Research Program.
- D. The amount of the faculty stipend will be determined by the Dean for the Natural Sciences and Mathematics, based on the funds available each year. This stipend can be layered on top of university awarded stipends.
- E. This endowment also provides funds for the continuation of projects during the academic year, as well as the monitoring and maintenance of created systems.
- F. For academic year research, students will be paid the same hourly rate as the summer research fellowship position, adjustable as needed to meet current standards.
- G. The Dean for the Natural Sciences and Mathematics, in conjunction with the chair of the Computer Science Department, will determine specific fund expenditures each year.

VI. Revisions

Any revisions to these guidelines will be decided by the Science Division Research Committee and a representative of the Hoogeboom Family, in consultation with the Advancement Division.

Agreement

The foregoing description and guidelines are acknowledged by the undersigned to be the controlling provisions of **The Marjorie G. Hoogeboom Student Faculty Research Fellowship** at Calvin University.
